

# VoIPBox

## Turn-Key SIP Trunk Recorder

The **VoIPBox** from Intelligent Recording provides a compact, turn-key **Stand-Alone Call Recording Solution** for those wanting full-time recording for SIP Trunks.

Your **VoIPBox** is delivered with software specific to your requirements already installed. All that's required on site is some simple connections to your router and our provided pre-programmed hardware and switch, no need for a degree in IT. **Intelligent Recording makes it simple!**

**VoIPBox** is an ideal solution for a single location business, or for multi-location businesses wanting to record branch locations, yet store and manage their calls on their secured network.

The **VoIPBox** is licensed in 4 trunk increments and can support up to 24 SIP Trunks. For larger applications, our BackOffice 4ip solution is available.

### You are in Control

Using a common data output (SMDR) from most every telephone system, the **VoIPBox** can be programmed by Intelligent Recording to record all calls and organize the calls by extension number of each telephone. Additionally, an exclusion table can be created to remove specific extensions from being recorded. Better yet, you decide where to store and how long to keep the recorded calls without monthly service fees or security concerns. You are in control.

# Management Software

## VoIPBox Manager

The VoIPBox comes with VoIPBox Manager software that allows you to search for calls based on :

- Extension (with SMDR)
- Caller ID/Number Dialed
- Date/Time Range

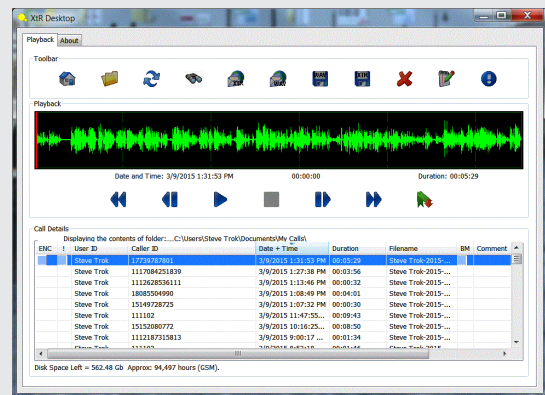

Other Key Features:
