you can have your own number –
one that you update

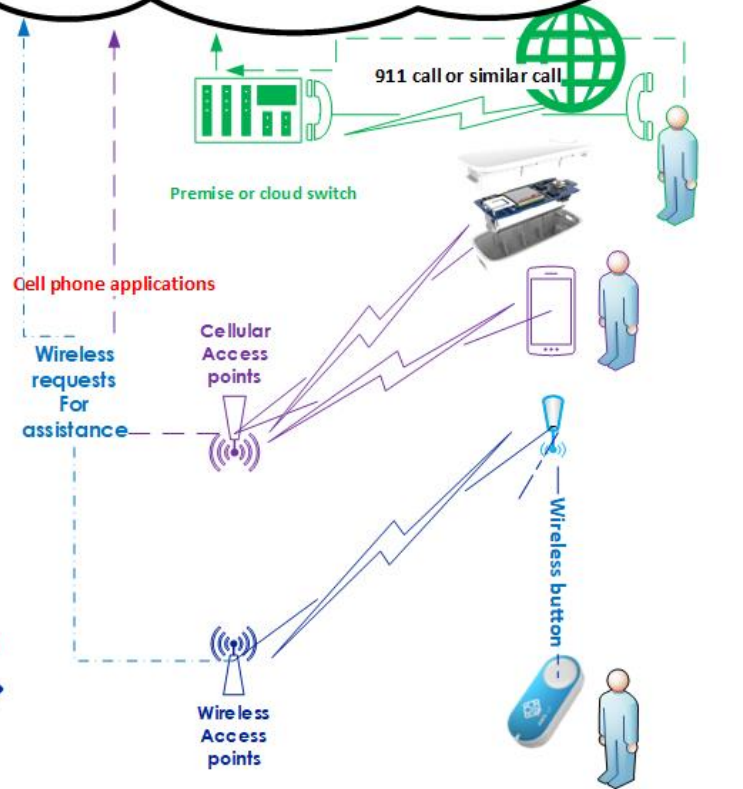

The Ultimate Communicator has built-in messaging for voice, text, email and a schedule manager for school bells, factory whistles, and institutional announcements for timed events.

Ultimate Communicator with Smart Plug-in's

Getting messages from cellular, wireless, or phone & network based trigger tools.

Informational messages sent via voice, text, email (even overhead paging), and with our data network pager application.

The Ultimate Communicator software allows “Smart Plugins.” these plugins allow different triggers for emergencies and informational updates. These devices have cloud, network and cellular connections for almost any environments.

Ideal for:

- Hotels
- Factories
- Campus or military bases
- City, county, state or federal agencies of government

The application grows with you as needs increase.

what **if** ...

A stranger leaves a backpack...

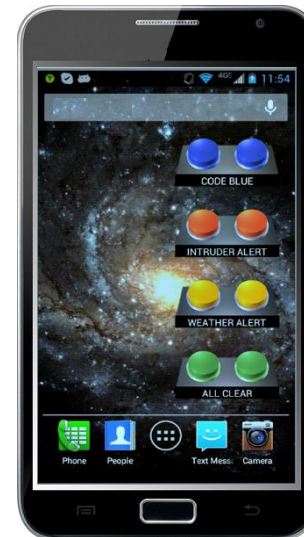

A chemical spills near a flame...

An intruder runs past the office...

No one wants to budget for events we hope will never happen, ***but in today's world;*** we all know action plans need to be in place ... soon!

UC OnTimeforAnything
software and service can help for as little as a cup of coffee per day, and **if you call now, we start tomorrow.**
